SUMMARY

Final-year B.E. student in Electronics & Telecommunication with strong expertise in programming (Python, C++, SQL), software tools, and practical experience in IoT and computer vision projects. Skilled in designing, developing, and deploying real-time solutions, with hands-on experience in Raspberry Pi, OpenCV, and automation systems. Adapt at problem-solving, system analysis, and collaborating in multidisciplinary teams. Passionate about leveraging technology and eager to contribute to innovative software and technology projects.

PROJECTS

Enhanced ATM Security using Computer Vision

October-2025

- Built a real-time surveillance system using Raspberry Pi, Python, and OpenCV to detect faces, masks/scarfs, and suspicious movements.
- Implemented attack detection algorithms to identify aggressive or abnormal user behavior inside the ATM cabin.
- Integrated TTS alerts to warn users or notify security personnel during high-risk events.
- Added live monitoring and video streaming, enabling remote surveillance from any device.
- Designed the system to work in low-light conditions and optimized performance for edge-based (on-device) processing on Raspberry Pi.

EDUCATION

Bachelors of Engineering in Electronics and telecommunication

2023-2026

Marathwada Mitra Mandal's College of Engineering

SE : 7.59 CGPA

TE : 7.76 CGPA

Diploma in Computer Engineering

2020-2023

TSSM's BSCOER Polytechnic, Pune

83.31 %

Schooling

2019-2020

Renuka Swaroop Memorial Girl's High School, Pune

86.20 %

CERTIFICATIONS

CCNA(MODULE1): Cisco Certified Network Associate – Verification Link..↗

CCNA(MODULE2): Cisco Certified Network Associate – Verification Link..↗

Cyber threat management: Cisco Certified Network Associate – Verification Link..↗

EXTRACARRICULAR ACTIVITIES

- Hands on Experience in MS Excel, MS Power Point, MS word, Canva
- Member of GDG(GOOGLE DEVELOPERS GROUP) club.
- I was an NCC cadet. completed my a-cert exam, with strong sense of discipline and leadership.
